

Medical Grade Diode Laser

Hair Removal Equipment PL-118

What is Medical Grade Diode Laser Hair Removal Equipment PL-118 ?

Medical Grade Diode Laser Hair Removal Equipment PL-118 is a powerful and versatile treatment solution for a wide range of aesthetic needs. Treating different indications, this multiapplication platform offers a full spectrum of technologies and treatment methods that achieve outstanding results. Medical Grade Diode Laser Hair Removal Equipment PL-118 enables intelligent and patient-centric treatments that lead to enhanced results.

Most Effective Permanent Hair Removal

Safe And Effective For Skin Type I-VI

Medical grade laser hair removal machine provides highly effective, reliable and safe permanent hair removal treatments for a variety of challenging skin concerns.

Applications

Medical Grade Diode Laser Hair Removal Equipment PL-118 provides safe and effective treatments for a wide range of indications, including:

- ➔ Suitable for all skin types, even tanned skin
- ➔ Hair reduction
- ➔ Skin rejuvenation
- ➔ Permanent hair removal treatment

Remove hair on different part of body effectively. Such as armpit hair , beard hair, lip hair, hair line, bikini line hair, body hair and other unwanted hair.

Hair Removal

Laser hair removal treatments are one of the most popular aesthetic procedures today for both men and women. To achieve the best hair removal treatment results, you'll need to commit to attending multiple sessions over a designated amount of time according to a treatment plan. It's an investment now that pays amazing dividends in your future in terms of saving time and money, not having to constantly worry about maintaining the growth of unwanted hair.

Skin Rejuvenation

An 810nm diode laser is safe and efficacious for treating facial skin laxity, Maintenance treatment every two to three months may be the optimum interval for maintaining the results. The pleasant treatment elevates dermal temperature, generates thermal injury to the tissue which contracts existing fibers, stimulates the formation of new collagen and improves its alignment and thickness.

Advantages:

- ➔ With Sapphire Crystal on the treatment head that can be used forever without replacement.
- ➔ Water cycle & water temperature checking system and powerful abstractor extend the service life and safety for the machine.
- ➔ Advanced flash computer calculator: xenon lamp computer calculator system always show how many flashes you have used.
- ➔ Minimum energy loss: ceramic silver-gilt lumen reflects diffuse light onto laser rod to produce stronger power.
- ➔ Powerful semiconductor cooling, air cooling and water cooling can ensure longer working time.
- ➔ Short treatment time and quick recovery have little effect on patients' daily work.
- ➔ Easier installation: plug-and-play connectors.

Technical Specifications

Fuse	Max10A
Frequency	1~10Hz
Net Weight	50KG
Gross Weight	60KG
Input Power	2000W
Temperature	0~40°C
Pulse Width	10~200ms
Handle with 6 bars	600W
Energy Density	0~150J/c m ²
Package Size	115cm*53cm*56cm
Mode	Single Pulse and continuous pulse
Cooling System	water cooling +wind cooling+ Semiconductor
Laser Type	High Quality 808nm Semiconductor Laser Beam Source
Electrical Requirement	AC 220V 10% 50Hz; AC 110V 10% 60Hz
Output	808nm Treatment of handle out direct output mode(hand gun type)
