

# Multifunction Cryolipolysis Slimming Machine

## —PL-brg80

COMBINED TECHNOLOGIES  
FOR ENHANCED, LONG LASTING RESULTS

FAST, EASY TO USE,  
PLUG & PLAY TECHNOLOGY - NO TECHNICIAN NEEDED

TWO CRYO HANDLES CAN WORK AT THE SAME TIME  
SIGNIFICANTLY REDUCED TREATMENT TIME

UNIQUE DOUBLE CHIN TREATMENT HANDPIECE

Multifunctional Cryolipolysis Slimming Machine PL-brg80 is PrettyLasers's Professional workstation for body contouring, skin tightening and aesthetic enhancement. The platform combines the latest innovations in Ultrasound and Radio Frequency (RF) technologies to deliver effective, highly customized treatments with natural, long lasting results

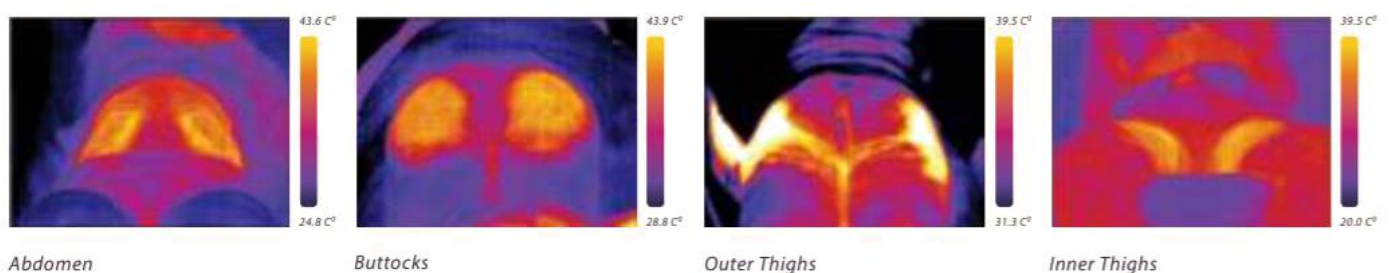

6 in 1 multifunction cryolipolysis slimming machine (3 freezing handles + 360° mini fat freezing handle+40K cavitation handle + Sixpolar RF handle) is a safe and extremely efficient no-surgical and non-invasive procedure for cosmetic and aesthetic body contouring and body shaping, body slimming, fat reduction, developed based on extensive research, proven as the most effective way for body shaping, slimming and reduction of cellulite & fat.

The PL-brg80 Cryolipolysis system is based on tissue heating achieved by the synergy of strong ultrasonic and Radio-Frequency. The PL-brg80 system is intended for cosmetic and aesthetic contouring, body slimming and body shaping. Any two freezing handles could work simultaneously or separately.

### Stationary applicators designed for body contouring and skin tightening

Using strong ultrasound to shake fat cells, reducing fatty acids, enhancing blood circulation, and finally letting fatty acids excrete through lymphatic drainage, thereby reducing body weight. It can also lighten cellulite and firm skin. Utilizing 40KHz cavitation, PL-brg80 tightens and shapes large areas of the body safely and effectively by delivering energy within the skin. This synergetic combination of RF and Ultrasound technologies enables enhanced effectiveness and significantly improved results.

### Thermal Image

# DESCRIPTION

## PARTIAL DETAILS OF THE INSTRUMENT

Cavitation

Six polar RF

## TREATMENT AREAS

### PrettyLaser's Solution for Small Areas

#### Effective - Multi-polar RF

- Submental
- Back of the Arm
- Face

Working with a 360° cryo applicator provides an ideal solution for small areas, promoting better results for fat reduction and skin tightening in areas that are typically more challenging to reach.

## 360° Mini Cryo For Chin

---

**Multipolar Radio Frequency** is the new, revolutionary skin rejuvenation system requiring no surgery. You will see instant results, without any pain or recovery downtime. Ageing is inevitable, but with, new scientific breakthroughs, has made delaying the process and even turning back the clock a

As the aesthetics market continues to evolve according to dynamic patient needs, PrettyLasers recognizes that segmentation and synergy enable improved effectiveness and better results.

Pretty has created a Small Areas Treatment concept, comprised of innovative applicators, 360 degree mini cryo handle. This solution integrates both Ultrasound and Radio Frequency technologies, and works seamlessly with Pretty's

Radio frequency is one kind of high frequency electromagnetic wave, it can penetrate the dermis and subcutaneous tissue through the fat layer, take heat into deep skin and then accelerate regeneration and reconstruction of skin deep-tissue. Use proprietary technology to create a highly efficient and tightly woven energy matrix. This dense energy matrix penetrates multiple layers of the dermis heating it from the inside out. Complete skin penetration ensures exponentially improved clinical efficacy and products clearly visible results. Multi-polar RF improves skin laxity.

### **Powerful - Cavitation**

Through the strong ultrasonic, direct into the fatty layer, speedily vibrate deep-seated cellulite, produce numberless vacuum air packets, mightily strike the fatty cells, let them produce inner cracking, and dissolve to be the free fatty acid.

Cavitation - Combines a new type of ultrasound technology featuring guided ultrasonic waves, with an 55 mm diameter sonotrode contact area for high speed contouring of especially large treatment areas.

Unlike liposuction (which can be a daunting and extreme option for many), cavitation is the perfect fat reduction treatment for those that do not want to take any excessive measures. It is safe, non-surgical, and requires no recovery time. It's also one of the only technologies available that can show you results as effective as those you expect from liposuction or surgery, provided you complete the recommended number of sessions (usually between 8-12).

## **INDICATIONS**

### Body & Face Contouring

PrettyLasers uses the power and efficiency of combined technologies to eliminate excess fat and loose skin, visibly improving the shape and contours of the face and body. The synergy of ultrasound and RF technologies achieves superior results to those of either technology on its own. Ultrasound shear waves selectively destroy fat cells while Multi-polar RF accelerates their metabolism for fast lymphatic drainage. The application of RF heat energy following fat destruction induces a volumetric contraction effect, tightening the skin and improving its texture while also building new collagen.

## **BENEFITS**

### **COMBINED TECHNOLOGIES**

Combined technologies and treatment options yield faster, longer-lasting results with fewer treatment sessions.

### **SAFE**

Treatments with PL-brg80 are safe and effective for all skin types (I-VI) as well as for thin and delicate areas of the face, neck and décolleté areas.

### **COMFORTABLE**

Gradual heating and an integrated cooling system prevent pain for more comfortable treatment.

### **NO DOWNTIME**

Patients may return to their normal activities

# CRYO HANDLE

The Cryo handle has 4 models to choose from  
Two Cryo handles can work at the same time

## LONGER COOLING PLATES

The maximum treatment area is over 40% of the cooling plate

## MEDICAL SILICA GEL

Effectively observe the treatment and protect the skin

## TOUCH SCREEN

Real-time monitoring treatment  
head temperature change error alarm

## UNIQUE TREATMENT HEAD

Unique double chin  
treatment handpiece

Big handle: treat area  
(250mm\*120mm)  
---for belly, back,  
buttock etc.

Mid handle: treat area  
(200mm\*100mm)  
---for waist, thigh, etc

Small handle: treat  
area (120mm\*60mm)  
---for thigh, arm, crus

360° Mini cryo handle  
treat area  
(76mm\*40mm)  
---for double chin, arm

## Technical Parameters

<b>Input voltage</b>	AC110V/220V 50-60Hz
<b>Screen</b>	10.4 inch color touch screen
<b>Cooling output temperature</b>	-16 °C- 5°C
<b>Default time</b>	0-60min
<b>Ambient temperature</b>	5°C-+42°C
<b>Atmospheric pressure</b>	80KPa-106KPa
<b>Package size</b>	62cm*62cm*130cm(L*W*H)
<b>Power consumption</b>	<=800w
<b>Cooling liquid</b>	pure water
<b>Cooling System</b>	9L water tank
<b>Output Vaccum pressure</b>	0-110KPa
<b>Fuse size</b>	F3AL250V
<b>Relative humidity</b>	≤85%
<b>N.W./G.W.</b>	30KGS/50KGS
<b>Warranty time</b>	6 months for accessories,24 months for machine body

# Effective treatment results

---

The procedure can reduce the treated fat layer by 20 to 40 percent, average reduction 20 percent. Visible differences in contour emerge after about three weeks, but the most dramatic results take up to two months to show.

## Contrast effect

## One treatment

## Two treatment
